Subject: Midessa and West County Road 112 Update on Site Access
Date: 03/24/2011 09:58 AM

Dani, and Mike,

Midland County has denied access to the county road right-of-ways for the Midessa and WCR 112 projects as well as the Horseshoe Arena property at WCR 112. The County Commissioners for both districts provided notification in a phone conversation yesterday, March 23, 2010.

For Midessa, I think we have enough well locations at the former Pioneer facility as well as likely locations south of the property to make it cost effective to start the well installation. We'll begin contacting landowners with proposed well locations at the rest of the site.

For WCR 112, I think we'll focus our initial efforts at landowner access at potential source area locations as well as right-of-ways in the City of Midland. For the area south of I-20, we'll look at the area along the leading edge of the plume. The sampling event scheduled for the week of April 11th, and the community meeting on April 12th, will provide an opportunity to contact landowners for potential monitoring wells.

Please let me know if you have any questions. Thanks.
